Projects

Weather App | github.com/kylest0kes/weather_app | kylest0kes.github.io/weather_app/

- Weather application that allows a user to search various locations and receive the current weather and a 5 day forecast for that location, and then stores that location to a searched list.
- Responsible for the whole front end layout, style and backend functionality and proper API calls.
- JQuery, Bootstrap, OpenWeather API (Current Weather, 5-day forecast, UV Index).

Brew For You | github.com/eunahk92/brew-for-you | eunahk92.github.io/brew-for-you/

- Application that will take in and pin a user's current location, and will generate a list of nearby breweries, with all locations relevant information, and its Google Maps location.
- Responsible for using Google Maps API and Google Maps Geolocation to generate a map interface to show selected brewery location, as well as pin user current location.
- JQuery, Open Brewery DB API, Google Maps API, Google Maps Geolocation, UIKit.

Post To Sold | github.com/kimnana45/Project2 | pr0jectnum2.herokuapp.com/

- Full stack application that allows a user to create a secure account, in order to post and “purchase” various items other users have posted.
- Responsible for the entire frontend development and implementation of Express Handlebars in conjunction with the frontend layout.
- JQuery, Filestack API, Express, Express Handlebars, MySQL Workbench, Sequelize, Heroku, Materialize.
